KAMYK.PL

About us

We do our job with joy and pleasure, as we are passionate and fully engaged in it. The quality, service and meeting the deadlines are guaranteed - special deals can be made according to the museums' requirements. We cooperate with various artists and scientists - if only the latter ones are willing to. ;) Gradual upgrading of the materials assortment being used for the models and scenography production is crucial in our job. We learn from the best ones in this industry and create our own unrepeatable solutions. We are ready for new challenges - we will create every model of a plant, animal or a museum's scenography that is ordered.
Any questions?
Do not hesitate - contact us and ask! You will always receive an answer!
